

DESCRIPTION

According to Network Rail RT/E/S/40045 Issue 5

The A-Belco AC / DC points heating transformers are continually rated Dual Wound transformers used trackside to provide power to heating elements within points heating systems ensuring safe railway tracks in cold and freezing weather.

Comply with BS EN 61558. Network Rail approved.

KEY FEATURES

Corrosion resistant
Long life Cycle - designed for a minimum of 15 years

SPECIFICATION

Supply	Up to 12 heating elements
Housing	Hot dipped galvanised sheet steel
IP Rating	IP44
Encapsulation	Petroleum Jelly

ELECTRICAL SPECIFICATION

Primary Voltage	Nominally 230V Ac <single phase?> Includes tapplings to accommodate up to 6 variations of input voltage
Secondary Voltage	110V Ac Each circuit is fitted with fuse protection
Rating	5KVA or 10KVA continually
